Career Objective

Motivated and detail-oriented student with strong technical skills in programming, web development, and Artificial Intelligence. Experienced in developing AI-based solutions and passionate about applying emerging technologies like blockchain and data science to real-world challenges. Seeking opportunities to grow as a software developer and AI enthusiast.

Education

Intermediate	Krishnaveni Junior College
SSC	Gnana Vidyaniketha GPA: 9.7/10

Projects

AI Plant Disease Detection

- Designed and implemented an AI model to detect plant leaf diseases using image processing and machine learning techniques.
- Applied preprocessing, feature extraction, and classification for accurate disease identification.
- Aimed to help farmers with early detection and prevention of crop damage.

Technical Skills

Programming Languages: C, C++, Java, Python

Web Development: HTML, CSS, JavaScript

Core Competencies: Artificial Intelligence, Machine Learning, Image Processing

Other Skills: Debugging, Problem-Solving, Software Development

Certifications

Blockchain Technologies – Hashgraph Association, 2025

Python for Data Science – NPTEL

Strengths

- Quick learner, adaptable to new technologies
- Strong logical and analytical thinking
- Effective teamwork and communication skills
